By implementing a personal leaderboard with daily, weekly, or monthly rankings based on points earned, users who actively contribute to the ecosystem can be accurately rewarded through airdrops.

Recognizing and rewarding the active involvement of community users in quests and activities can significantly increase engagement within the community.

On-Chain Verification

DeGame offers a conditional filtering tool and an on-chain verification tool that can verify the quality of new users through its on-chain data. The validation criteria can be customized according to the project's own needs, making Sybil attacks difficult and preventing fake accounts and/or numbers.

Two rounds of funding \$10 million from 2021 to 2022 respectively, led by Folius, Kenetic, Hack VC and A&T, followed by 20 other institutions

DE GAME

Overall Introduction

GAMEFI MARKET REVIEW

A BOOMING MARKET

GameFi will grow into a hundred billion dollar industry within 5 years, bringing massive infrastructure oppotunities for builders.

Both investors and players have a strong demand to explore new games, game related news and reviews on our one-stop blockchain gaming platform.Compared with traditional games, NFT games have a high entry barrier and it's hard to identify quality projects in today's competitive market.

DEGAME INTRODUCTION

DeGame.com is a Game-Fi publishing community that helps players and investors search and participate in all GameFi projects.

While using DeGame, users can track GameFi tokens and NFTs prices, identify game earning opportunities, and analyze onchain and off-chain data of projects to make investments. Launched in 2021 October, Degame has already listed more than 4000 GameFi projects and become the most comprehensive GameFi projects' prices and data aggregator and search engine.

DEGAME PRODUCTS

Cooperation Models

CPA mode: Drive traffic to partner website, conduct data audits using attribution platforms (such as Apps Flyer and Adjust), and pay per click.

CPS mode: provides a channel package that is integrated with SDK, which reports user recharge amounts (i.e., the number of flow times the amount) and divides the amount accordingly. 20% is recommended.

Traffic Estimation

It is expected to bring more than 100,000 new users every month, and we will decide the user area based on the purchase price.

Community Module

Community features will support various project management communities and motivate users to complete customized tasks
